made public here to-day by the Rev. Grand Central Station on Friday night. letter to Mr. Taft was this:

is it not your conviction and policy that lie dignitaries and the Catholic Church should have greater consideration from a publi official, and especially fron the Chief Executive of our nation, than any other regularly recognized religious body?

Here is the reply Mr Taft made:

I do not think that Catholic dignitaries in the Catholic Church should have greater consideration from a public official than any other regularly organized religious It has happened by reason of the fact that the Philippine Government under Catholic Church and that that union had he severed and property and other interests had to be assigned to the Church to the State I had much to do with the heirarchy of the Catholic Church and visited Rome in order to bring about a settlement. The settlement has been brought about, and in my judgment it is fair and just to all-parties.

I am not a Catholic and have not been affliated in any way with the Catholic Church All I have attempted to do was to do justice to that Church and to the Filipino people. I have treated that Church exactly as I would have treated any other church had it been in a similar position to that of the Catholic Church.

Here are three other questions asked by the Bartist minister:

This would have led to a second revolution, and it was an absolute political necessity that we should buy the lands and then attempt to dispose of on long and easy terms of purchase

C. the virtual scratch man The little man ran a plucky race, but th handicaps were too steep for him and he just failed to get placed. First prize went to C. English of the Y. M. C. A., who had

the liberal allowance of 75 yards Another good race was the half mile handicap. The fine field of twenty-five limit of 48 yards, made the pace. a couple of laps E. J. Sweeney of the Pastime A. C., who had 34 yards, moved up toward the front brigade and with

He started around the block at haif past 9 yesterday morning and finished his circuiting at half past 8 last night, bettering the time he'd promised to make by a good two hours.

He did the first lap at the rate of six miles an hour and the last lap at the rate of five miles. He walked constantly except for five minutes each hour and time taken for a light luncheon toward noon.
